4.a. Rationale

The rationale for the study is to provide a comprehensive overview of the current state of the country's health and development. The study is based on the assumption that the data collected from the CDHS 2016 survey is representative of the population. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusion. The study is based on the assumption that the data collected from the CDHS 2016 survey is representative of the population. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusion.

4.b. Comment and limitations

The study is based on the assumption that the data collected from the CDHS 2016 survey is representative of the population. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusion. The study is based on the assumption that the data collected from the CDHS 2016 survey is representative of the population. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusion.

4.c. Method of computation

The study is based on the assumption that the data collected from the CDHS 2016 survey is representative of the population. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusion. The study is based on the assumption that the data collected from the CDHS 2016 survey is representative of the population. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusion.

5. Data availability and disaggregation

The data for this study is available from the CDHS 2016 survey. The data is disaggregated by sex, age, and education level. The data is available in both English and Swahili. The data is available in both English and Swahili. The data is available in both English and Swahili. The data is available in both English and Swahili.
