#### 4.a. *Rationale*

[illegible]

#### 4.b. Comment and limitations

The data sources used in the analysis are summarized in Table 1. The data sources are categorized into three main groups: (1) National level data, (2) Regional level data, and (3) Individual level data. The National level data includes the National Health and Medical Research Council (NH&MRC) National Survey of Mental Health and Wellbeing (NSMHWB) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Regional level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Individual level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS).

#### 4.c. Method of computation

The data sources used in the analysis are summarized in Table 1. The data sources are categorized into three main groups: (1) National level data, (2) Regional level data, and (3) Individual level data. The National level data includes the National Health and Medical Research Council (NH&MRC) National Survey of Mental Health and Wellbeing (NSMHWB) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Regional level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Individual level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS).

#### 4.d. Validation

The data sources used in the analysis are summarized in Table 1. The data sources are categorized into three main groups: (1) National level data, (2) Regional level data, and (3) Individual level data. The National level data includes the National Health and Medical Research Council (NH&MRC) National Survey of Mental Health and Wellbeing (NSMHWB) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Regional level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Individual level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS).

#### 4.i. Quality management

NIS (National Information System) is a system that provides a comprehensive overview of the data sources used in the analysis. The data sources are categorized into three main groups: (1) National level data, (2) Regional level data, and (3) Individual level data. The National level data includes the National Health and Medical Research Council (NH&MRC) National Survey of Mental Health and Wellbeing (NSMHWB) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Regional level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Individual level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS).

### 5. Data availability and disaggregation

The data sources used in the analysis are summarized in Table 1. The data sources are categorized into three main groups: (1) National level data, (2) Regional level data, and (3) Individual level data. The National level data includes the National Health and Medical Research Council (NH&MRC) National Survey of Mental Health and Wellbeing (NSMHWB) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Regional level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Individual level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS).

### 6. Comparability/deviation from international standards

The data sources used in the analysis are summarized in Table 1. The data sources are categorized into three main groups: (1) National level data, (2) Regional level data, and (3) Individual level data. The National level data includes the National Health and Medical Research Council (NH&MRC) National Survey of Mental Health and Wellbeing (NSMHWB) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Regional level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS). The Individual level data includes the Australian Bureau of Statistics (ABS) National Health Survey (NHS) and the Australian Bureau of Statistics (ABS) National Health Survey (NHS).
