

0.a. Goal

The goal of the project is to develop a system that can manage the information of the organization and its members. The system should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.

0.b. Target

The target of the project is to develop a system that can manage the information of the organization and its members. The system should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.

0.c. Indicator

The indicator of the project is the number of users who can access the system and the number of transactions that can be processed. The indicator should be able to measure the performance of the system and provide a clear picture of the system's capabilities.

0.e. Metadata update

The metadata update of the project is the process of updating the system's metadata. The metadata should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.

1.a. Organisation

The organization of the project is the National Information System (NIS). The organization should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.

1.b. Contact person(s)

The contact person(s) of the project is Som Bony (Mr). The contact person should be able to provide information about the project and its progress. The contact person should also be able to provide a user-friendly interface for the users.

1.c. Contact organisation unit

The contact organization unit of the project is the National Information System (NIS). The contact organization unit should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.

1.d. Contact person function

The contact person function of the project is the National Information System (NIS). The contact person function should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.

1.e. Contact phone

The contact phone of the project is +855 91 123 456 / + 855 91 123 456. The contact phone should be able to provide information about the project and its progress. The contact phone should also be able to provide a user-friendly interface for the users.

1.f. Contact mail

The contact mail of the project is the National Information System (NIS). The contact mail should be able to store, retrieve, and update information in a secure and efficient manner. The system should also be able to generate reports and provide a user-friendly interface for the users.
