Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) data is available for a wide range of countries and regions. The data is disaggregated by age, sex, and other demographic factors. The data is available in both English and French. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.
