### 3.a. Data sources

(MEF) (MEYS)

### ***3.b. Data collection method***

The data sources are categorized into three groups: (1) Data sources that are publicly available, (2) Data sources that are not publicly available but are accessible to researchers, and (3) Data sources that are not publicly available and are not accessible to researchers. The first group includes data from the MEYS, the second group includes data from the MEYS, and the third group includes data from the MEYS.

### 3.c. Data collection calendar

The data collection calendar is as follows:

### 3.d. Data release calendar

The data release calendar is as follows:

### 3.e. Data providers

The data providers are as follows:

### 3.f. Data compilers

The data compilers are as follows:

### 3.g. Institutional mandate

The institutional mandate is as follows: The NIS is the main data source for the project. The NIS is a public database that contains information on the economic activities of the firms in the country. The NIS is maintained by the National Institute of Statistics (NIS). The NIS is a public database that contains information on the economic activities of the firms in the country. The NIS is maintained by the National Institute of Statistics (NIS). The NIS is a public database that contains information on the economic activities of the firms in the country. The NIS is maintained by the National Institute of Statistics (NIS).

### 4.a. Rationale

The rationale for the project is as follows: The project aims to provide a comprehensive overview of the economic activities of the firms in the country. The project is based on the data from the NIS. The project is based on the data from the NIS. The project is based on the data from the NIS.

### 4.b. Comment and limitations

The comment and limitations are as follows: The project is based on the data from the NIS. The project is based on the data from the NIS. The project is based on the data from the NIS.

#### 4.c. Method of computation

[illegible]
$$= \frac{1}{n} \sum_{i=1}^n \frac{1}{\sqrt{2\pi}} \exp\left(-\frac{1}{2} \left(\frac{y_i - \mu}{\sigma}\right)^2\right)$$
[illegible][illegible]

#### 4.d. Validation

[illegible]

#### 4.i. Quality management

[illegible]
