

0.a. Goal

0.a. Goal: The goal of the indicator is to measure the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

0.b. Target

0.b. Target: The target of the indicator is to measure the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring. The target is to achieve the Sustainable Development Goals (SDGs) by 2030.

0.c. Indicator

0.c. Indicator: The indicator is a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

0.d. Series

0.d. Series: The series is a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

0.e. Metadata update

0.e. Metadata update: The metadata update is a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

0.f. Related indicators

0.f. Related indicators: The related indicators are a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

1.a. Organisation

1.a. Organisation: The organisation is a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

1.b. Contact person(s)

1.b. Contact person(s): The contact person(s) is a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

1.c. Contact organisation unit

1.c. Contact organisation unit: The contact organisation unit is a measure of the progress of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and monitoring.

1.d. Contact person function

4.a. Rationale

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.

4.c. Method of computation

Demographic and Health Survey (DHS) data are collected through a household survey. The data are then processed and analyzed using a computer program. The results are presented in a report.

4.d. Validation

Demographic and Health Survey (DHS) data are validated through a series of steps. First, the data are checked for completeness and accuracy. Then, the data are compared with other sources of information to ensure consistency. Finally, the data are reviewed by a panel of experts to ensure that they are reliable and valid.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) data are available in a variety of formats. The data can be accessed through a web portal or downloaded in a variety of formats, including Excel, PDF, and HTML. The data are also available in a disaggregated format, allowing users to view data by country, region, and age group.

6. Comparability/deviation from international standards

Demographic and Health Survey (DHS) data are comparable to international standards. The survey is conducted in a standardized manner, ensuring that the data are consistent and reliable. The data are also disaggregated by country, region, and age group, allowing for comparison with other countries and regions. The data are also available in a disaggregated format, allowing users to view data by country, region, and age group.
