

## **0.a. Goal**

0.a. The goal of the indicator is to monitor the progress of the implementation of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making.

## **0.b. Target**

0.b. The target of the indicator is to ensure that the implementation of the SDGs is on track and to provide a basis for policy-making. The target is to ensure that the implementation of the SDGs is on track and to provide a basis for policy-making. The target is to ensure that the implementation of the SDGs is on track and to provide a basis for policy-making.

## **0.c. Indicator**

0.c. The indicator is defined as the number of people who are in a state of poverty (SDG 1) (EN)

## **0.d. Series**

0.d. The series is defined as the number of people who are in a state of poverty (SDG 1) (EN)

## **0.e. Metadata update**

0.e. The metadata update is defined as the number of people who are in a state of poverty (SDG 1) (EN)

## **0.f. Related indicators**

0.f. The related indicators are defined as the number of people who are in a state of poverty (SDG 1); the number of people who are in a state of poverty (SDG 1); the number of people who are in a state of poverty (SDG 1) (EN)

## **1.a. Organisation**

1.a. The organisation is defined as the National Institute of Statistics (NIS) (EN)

## **1.b. Contact person(s)**

1.b. The contact person(s) is defined as the National Institute of Statistics (NIS) (EN)

## **1.c. Contact organisation unit**

1.c. The contact organisation unit is defined as the National Institute of Statistics (NIS), the National Institute of Statistics (NIS), the National Institute of Statistics (NIS) (EN)

## **1.d. Contact person function**

#### ***4.a. Rationale***

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.

### 4.c. Method of computation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.

### 4.d. Validation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.

## 5. Data availability and disaggregation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.

## 6. Comparability/deviation from international standards

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.

## 7. References and Documentation

[1] Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development goals and to inform policy and program decisions.
