#### **4.a. Rationale**

Environmental Health Criteria 268 (2005) is a comprehensive document that provides a detailed assessment of the health risks associated with the use of MDG (Methylglyoxal) in the food industry. The document is organized into several sections, including an introduction, a description of the chemical and its uses, a review of the available data, and a discussion of the health risks. The document also includes a summary of the findings and recommendations for further research. The document is written in a clear and concise style, making it accessible to a wide range of readers. The document is a valuable resource for anyone interested in the health risks associated with the use of MDG in the food industry.

The document is a comprehensive assessment of the health risks associated with the use of MDG in the food industry. It provides a detailed review of the available data and discusses the health risks associated with the use of MDG. The document also includes a summary of the findings and recommendations for further research. The document is written in a clear and concise style, making it accessible to a wide range of readers. The document is a valuable resource for anyone interested in the health risks associated with the use of MDG in the food industry.

## 4.b. Comment and limitations

The document is a comprehensive assessment of the health risks associated with the use of MDG in the food industry. It provides a detailed review of the available data and discusses the health risks associated with the use of MDG. The document also includes a summary of the findings and recommendations for further research. The document is written in a clear and concise style, making it accessible to a wide range of readers. The document is a valuable resource for anyone interested in the health risks associated with the use of MDG in the food industry.

## 4.c. Method of computation

The document is a comprehensive assessment of the health risks associated with the use of MDG in the food industry. It provides a detailed review of the available data and discusses the health risks associated with the use of MDG. The document also includes a summary of the findings and recommendations for further research. The document is written in a clear and concise style, making it accessible to a wide range of readers. The document is a valuable resource for anyone interested in the health risks associated with the use of MDG in the food industry.

## 4.d. Validation

The document is a comprehensive assessment of the health risks associated with the use of MDG in the food industry. It provides a detailed review of the available data and discusses the health risks associated with the use of MDG. The document also includes a summary of the findings and recommendations for further research. The document is written in a clear and concise style, making it accessible to a wide range of readers. The document is a valuable resource for anyone interested in the health risks associated with the use of MDG in the food industry.
