4.a. Rationale

The rationale for this study is to provide a comprehensive overview of the current state of research on the topic of [topic]. This study is based on a review of the literature and a series of interviews with experts in the field. The study aims to identify the key issues and challenges in the field and to provide recommendations for future research. The study is organized into four main sections: (1) Introduction, (2) Literature Review, (3) Data Collection and Analysis, and (4) Conclusion. The study is based on a review of the literature and a series of interviews with experts in the field. The study aims to identify the key issues and challenges in the field and to provide recommendations for future research. The study is organized into four main sections: (1) Introduction, (2) Literature Review, (3) Data Collection and Analysis, and (4) Conclusion.

4.b. Comment and limitations

The study is based on a review of the literature and a series of interviews with experts in the field. The study aims to identify the key issues and challenges in the field and to provide recommendations for future research. The study is organized into four main sections: (1) Introduction, (2) Literature Review, (3) Data Collection and Analysis, and (4) Conclusion. The study is based on a review of the literature and a series of interviews with experts in the field. The study aims to identify the key issues and challenges in the field and to provide recommendations for future research. The study is organized into four main sections: (1) Introduction, (2) Literature Review, (3) Data Collection and Analysis, and (4) Conclusion.

4.c. Method of computation

The study is based on a review of the literature and a series of interviews with experts in the field. The study aims to identify the key issues and challenges in the field and to provide recommendations for future research. The study is organized into four main sections: (1) Introduction, (2) Literature Review, (3) Data Collection and Analysis, and (4) Conclusion. The study is based on a review of the literature and a series of interviews with experts in the field. The study aims to identify the key issues and challenges in the field and to provide recommendations for future research. The study is organized into four main sections: (1) Introduction, (2) Literature Review, (3) Data Collection and Analysis, and (4) Conclusion.

5. Data availability and disaggregation

The data for this study were obtained from the CDHS 2016 survey. The data are available in English and are disaggregated by sex, age, and education level. The data are available in English and are disaggregated by sex, age, and education level. The data are available in English and are disaggregated by sex, age, and education level. The data are available in English and are disaggregated by sex, age, and education level.
