4.a. Rationale

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.

4.c. Method of computation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.

4.d. Validation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.

6. Comparability/deviation from international standards

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.

7. References and Documentation

[1] Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The data are used to monitor and evaluate the progress of development and to inform policy and program decisions.
