

0.a. Goal

0.a. The goal of the indicator is to monitor the progress of the implementation of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and for the assessment of the impact of the implementation of the SDGs.

0.b. Target

0.b. The target of the indicator is to monitor the progress of the implementation of the Sustainable Development Goals (SDGs) and to provide a basis for policy-making and for the assessment of the impact of the implementation of the SDGs. The target is to ensure that the implementation of the SDGs is in line with the principles of the Sustainable Development Goals (SDGs) and that the implementation of the SDGs is in line with the principles of the Sustainable Development Goals (SDGs).

0.c. Indicator

0.c. The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (0.c.1).

0.d. Series

0.d.1 The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (0.d.1).

0.e. Metadata update

0.e.1 The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (0.e.1).

0.f. Related indicators

0.f.1 The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (0.f.1). The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (0.f.1).

1.a. Organisation

1.a.1 The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (1.a.1).

1.b. Contact person(s)

1.b.1 The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (1.b.1).

1.c. Contact organisation unit

1.c.1 The indicator is defined as the number of people who are in the process of implementing the Sustainable Development Goals (SDGs) (1.c.1).

1.d. Contact person function

4.a. Rationale

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.

4.c. Method of computation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.

4.d. Validation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.

6. Comparability/deviation from international standards

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.

7. References and Documentation

[1] Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.
