4.a. Rationale

The rationale for the study is to provide a comprehensive overview of the current state of the country's health and development. The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions. The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions. The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions.

4.b. Comment and limitations

The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions. The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions.

4.c. Method of computation

The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions. The study is based on a review of the latest available data from the CDHS 2016. The study aims to identify the key challenges and opportunities for the country's health and development. The study is organized into four main sections: 1. Introduction, 2. Methodology, 3. Results, and 4. Conclusions.

5. Data availability and disaggregation

The data for this study were obtained from the CDHS 2016. The data are available in English and are disaggregated by sex, age, and education level. The data are available in English and are disaggregated by sex, age, and education level. The data are available in English and are disaggregated by sex, age, and education level. The data are available in English and are disaggregated by sex, age, and education level.
