4.a. Rationale

The rationale for this study is to provide a comprehensive overview of the current state of research on the topic of [topic]. This study aims to identify the key factors that influence [topic] and to provide a clear and concise summary of the findings. The study is based on a review of the literature and a series of interviews with experts in the field. The findings of the study are presented in a clear and concise manner, with a focus on the key findings and their implications. The study is intended to provide a valuable resource for researchers and practitioners alike.

4.b. Comment and limitations

The study has several limitations, including the fact that it is based on a review of the literature and a series of interviews with experts in the field. This means that the findings are based on the information available at the time of the study and may not reflect the current state of research. Additionally, the study is limited by the scope of the research, which focuses on the topic of [topic] and does not cover other related topics. Despite these limitations, the study provides a valuable overview of the current state of research on the topic of [topic] and identifies key areas for further research.

4.c. Method of computation

The data for this study were obtained from the CDHS 2016 survey, which is a nationally representative survey of the population of [country]. The data were analyzed using a series of statistical tests, including chi-square tests and logistic regression. The results of the analysis are presented in a clear and concise manner, with a focus on the key findings and their implications. The study is intended to provide a valuable resource for researchers and practitioners alike.

5. Data availability and disaggregation

The data for this study are available in the CDHS 2016 dataset, which is available to researchers and practitioners through the DHS Program website. The data are disaggregated by [disaggregation variables], allowing for a detailed analysis of the data. The data are also available in a disaggregated format, allowing for a detailed analysis of the data. The data are available in a disaggregated format, allowing for a detailed analysis of the data.
