3.b. Data collection method

MoLVT (Molecular Lattice Vibration Theory) is a computational method used to calculate the vibrational frequencies of molecules. It involves solving the eigenvalue problem for the Hessian matrix, which is derived from the second derivatives of the potential energy function with respect to the atomic coordinates.

3.g. Institutional mandate

The institutional mandate of the TVET system is defined by the legal framework, which includes the TVET Law, the TVET Regulation, and the TVET Decree. The TVET Law is the primary legal instrument that defines the TVET system and its components. The TVET Regulation is a secondary legal instrument that provides detailed rules and procedures for the implementation of the TVET Law. The TVET Decree is a tertiary legal instrument that provides specific instructions and guidelines for the implementation of the TVET Regulation. The institutional mandate of the TVET system is to provide quality TVET education and training to the youth and adults, and to ensure that the TVET system is aligned with the needs of the labor market.

4.a. Rationale

The rationale for the TVET system is to provide quality TVET education and training to the youth and adults, and to ensure that the TVET system is aligned with the needs of the labor market. The TVET system is designed to provide a comprehensive and integrated TVET system that covers all levels of TVET education and training, from basic skills training to advanced technical education and training.

4.c. Method of computation

The method of computation for the TVET system is based on the TVET Law, the TVET Regulation, and the TVET Decree. The TVET Law defines the TVET system and its components, and the TVET Regulation and the TVET Decree provide detailed rules and procedures for the implementation of the TVET Law. The method of computation is to ensure that the TVET system is aligned with the needs of the labor market and to provide quality TVET education and training to the youth and adults.

4.d. Validation

The validation of the TVET system is based on the TVET Law, the TVET Regulation, and the TVET Decree. The TVET Law defines the TVET system and its components, and the TVET Regulation and the TVET Decree provide detailed rules and procedures for the implementation of the TVET Law. The validation process is to ensure that the TVET system is aligned with the needs of the labor market and to provide quality TVET education and training to the youth and adults.

4.i. Quality management

The quality management of the TVET system is based on the TVET Law, the TVET Regulation, and the TVET Decree. The TVET Law defines the TVET system and its components, and the TVET Regulation and the TVET Decree provide detailed rules and procedures for the implementation of the TVET Law. The quality management process is to ensure that the TVET system is aligned with the needs of the labor market and to provide quality TVET education and training to the youth and adults.

4.j. Quality assurance

The quality assurance of the TVET system is based on the TVET Law, the TVET Regulation, and the TVET Decree. The TVET Law defines the TVET system and its components, and the TVET Regulation and the TVET Decree provide detailed rules and procedures for the implementation of the TVET Law. The quality assurance process is to ensure that the TVET system is aligned with the needs of the labor market and to provide quality TVET education and training to the youth and adults.

4.k. Quality assessment

The quality assessment of the TVET system is based on the TVET Law, the TVET Regulation, and the TVET Decree. The TVET Law defines the TVET system and its components, and the TVET Regulation and the TVET Decree provide detailed rules and procedures for the implementation of the TVET Law. The quality assessment process is to ensure that the TVET system is aligned with the needs of the labor market and to provide quality TVET education and training to the youth and adults.

5. Data availability and disaggregation
