4.a. Rationale

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development and health programs.

4.c. Method of computation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development and health programs.

4.d. Validation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development and health programs.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development and health programs.

6. Comparability/deviation from international standards

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development and health programs.

7. References and Documentation

[1] Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on fertility, mortality, and other health-related issues. The data is used to monitor and evaluate the progress of development and health programs.
