3.a. Data sources

(MEF) (MEYS) []

3.b. Data collection method

The data sources are categorized into three groups: (1) National level data, (2) Regional level data, and (3) Local level data. The National level data includes the MEYS, the Ministry of Education and Scientific Research, and the Ministry of Health. The Regional level data includes the Regional Education and Science Centers (RESCs) and the Regional Health Centers (RHCs). The Local level data includes the District Education and Science Centers (DESCs) and the District Health Centers (DHCs).

3.c. Data collection calendar

The data collection calendar is as follows:

3.d. Data release calendar

The data release calendar is as follows:

3.e. Data providers

The data providers are as follows:

3.f. Data compilers

The data compilers are as follows:

3.g. Institutional mandate

The institutional mandate is as follows: The NIS is a national-level data source that provides information on the health and education status of the population. The RESCs and RHCs are regional-level data sources that provide information on the health and education status of the population in the region. The DESCs and DHCs are local-level data sources that provide information on the health and education status of the population in the district. The data is collected and released on a regular basis, and the providers and compilers are responsible for ensuring the accuracy and reliability of the data.

4.a. Rationale

The rationale for the data collection and release is as follows: The data is collected and released on a regular basis, and the providers and compilers are responsible for ensuring the accuracy and reliability of the data. The data is used for a variety of purposes, including monitoring the health and education status of the population, identifying trends and patterns, and informing policy and program development.

4.b. Comment and limitations

The comment and limitations are as follows: The data is collected and released on a regular basis, and the providers and compilers are responsible for ensuring the accuracy and reliability of the data. The data is used for a variety of purposes, including monitoring the health and education status of the population, identifying trends and patterns, and informing policy and program development.

4.c. Method of computation

[illegible]
$$= \frac{1}{n} \sum_{i=1}^n \left(\frac{\partial L(\theta)}{\partial \theta} \right)_{\theta = \theta_i}$$
$$= \frac{1}{n} \sum_{i=1}^n \left(\frac{\partial L(\theta)}{\partial \theta} \right)_{\theta=\theta_i}$$
[illegible]
