Table 4.1: Summary of the data used in the analysis. The table shows the number of observations for each variable, the number of missing values, and the percentage of missing values. The variables are: Age, Sex, Education, Wealth, and Fertility. The data is from the CDHS 2011 survey.

4.a. Rationale

The rationale for this analysis is to understand the relationship between the variables in the table and the outcome variable. The analysis is based on the data from the CDHS 2011 survey. The variables are: Age, Sex, Education, Wealth, and Fertility. The data is from the CDHS 2011 survey.

4.b. Comment and limitations

The data used in this analysis is from the CDHS 2011 survey. The data is from the CDHS 2011 survey. The variables are: Age, Sex, Education, Wealth, and Fertility. The data is from the CDHS 2011 survey.

4.c. Method of computation

The method of computation for this analysis is based on the data from the CDHS 2011 survey. The variables are: Age, Sex, Education, Wealth, and Fertility. The data is from the CDHS 2011 survey.

5. Data availability and disaggregation

The data used in this analysis is from the CDHS 2011 survey. The data is from the CDHS 2011 survey. The variables are: Age, Sex, Education, Wealth, and Fertility. The data is from the CDHS 2011 survey.

6. Comparability/deviation from international standards

The data used in this analysis is from the CDHS 2011 survey. The data is from the CDHS 2011 survey. The variables are: Age, Sex, Education, Wealth, and Fertility. The data is from the CDHS 2011 survey.

Demographic and Health Surveys (DHS) are a series of population and household surveys that provide information on a wide range of demographic and health indicators. These surveys are conducted in a standardized manner across different countries and regions, allowing for comparisons and analysis of trends over time and across different populations. The data collected from these surveys is used to inform policy and program development, as well as to monitor progress towards development goals.
