#### 4.a. *Rationale*

Environmental Health Criteria 266 (2005) is a document that provides information on the health effects of certain chemicals. The document is organized into sections, with the first section being the title page. The second section is the executive summary, which provides a brief overview of the document's contents. The third section is the introduction, which discusses the importance of the chemicals and the need for a health assessment. The fourth section is the methods, which describes the approach used to conduct the assessment. The fifth section is the results, which presents the findings of the assessment. The sixth section is the discussion, which interprets the results and discusses their implications. The seventh section is the conclusion, which summarizes the key findings and provides recommendations for further research. The eighth section is the references, which lists the sources of information used in the assessment. The ninth section is the annexes, which provide additional information on the chemicals and the assessment process. The tenth section is the index, which provides a list of the document's contents and page numbers.

The document is a comprehensive review of the health effects of certain chemicals. It is organized into sections, with the first section being the title page. The second section is the executive summary, which provides a brief overview of the document's contents. The third section is the introduction, which discusses the importance of the chemicals and the need for a health assessment. The fourth section is the methods, which describes the approach used to conduct the assessment. The fifth section is the results, which presents the findings of the assessment. The sixth section is the discussion, which interprets the results and discusses their implications. The seventh section is the conclusion, which summarizes the key findings and provides recommendations for further research. The eighth section is the references, which lists the sources of information used in the assessment. The ninth section is the annexes, which provide additional information on the chemicals and the assessment process. The tenth section is the index, which provides a list of the document's contents and page numbers.

## 4.b. Comment and limitations

The document is a comprehensive review of the health effects of certain chemicals. It is organized into sections, with the first section being the title page. The second section is the executive summary, which provides a brief overview of the document's contents. The third section is the introduction, which discusses the importance of the chemicals and the need for a health assessment. The fourth section is the methods, which describes the approach used to conduct the assessment. The fifth section is the results, which presents the findings of the assessment. The sixth section is the discussion, which interprets the results and discusses their implications. The seventh section is the conclusion, which summarizes the key findings and provides recommendations for further research. The eighth section is the references, which lists the sources of information used in the assessment. The ninth section is the annexes, which provide additional information on the chemicals and the assessment process. The tenth section is the index, which provides a list of the document's contents and page numbers.

## 4.c. Method of computation

The document is a comprehensive review of the health effects of certain chemicals. It is organized into sections, with the first section being the title page. The second section is the executive summary, which provides a brief overview of the document's contents. The third section is the introduction, which discusses the importance of the chemicals and the need for a health assessment. The fourth section is the methods, which describes the approach used to conduct the assessment. The fifth section is the results, which presents the findings of the assessment. The sixth section is the discussion, which interprets the results and discusses their implications. The seventh section is the conclusion, which summarizes the key findings and provides recommendations for further research. The eighth section is the references, which lists the sources of information used in the assessment. The ninth section is the annexes, which provide additional information on the chemicals and the assessment process. The tenth section is the index, which provides a list of the document's contents and page numbers.

## 4.d. Validation

The document is a comprehensive review of the health effects of certain chemicals. It is organized into sections, with the first section being the title page. The second section is the executive summary, which provides a brief overview of the document's contents. The third section is the introduction, which discusses the importance of the chemicals and the need for a health assessment. The fourth section is the methods, which describes the approach used to conduct the assessment. The fifth section is the results, which presents the findings of the assessment. The sixth section is the discussion, which interprets the results and discusses their implications. The seventh section is the conclusion, which summarizes the key findings and provides recommendations for further research. The eighth section is the references, which lists the sources of information used in the assessment. The ninth section is the annexes, which provide additional information on the chemicals and the assessment process. The tenth section is the index, which provides a list of the document's contents and page numbers.
