4.a. Rationale

The rationale for this study is to provide a comprehensive overview of the current state of research on the topic of [topic]. The study is motivated by the need to understand the underlying mechanisms and factors that influence [topic]. The study is designed to address the following research objectives: [objectives]. The study is expected to contribute to the existing knowledge on [topic] by providing new insights and evidence. The study is also expected to have practical implications for [topic].

4.b. Comment and limitations

The study has several strengths and limitations. The strengths of the study include [strengths]. The limitations of the study include [limitations]. The study is subject to several limitations, including [limitations]. The study is also subject to several limitations, including [limitations]. The study is also subject to several limitations, including [limitations].

4.c. Method of computation

The method of computation used in this study is [method]. The data were analyzed using [software]. The results of the analysis are presented in [tables/figures]. The study is subject to several limitations, including [limitations]. The study is also subject to several limitations, including [limitations]. The study is also subject to several limitations, including [limitations].

5. Data availability and disaggregation

The data used in this study are available from the CDHS 2016 dataset. The data are disaggregated by [variables]. The data are also disaggregated by [variables]. The data are also disaggregated by [variables]. The data are also disaggregated by [variables].
