Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) data is available for a wide range of countries and regions. The data is available in a disaggregated format, allowing for analysis by age, sex, and other demographic factors. The data is available in a disaggregated format, allowing for analysis by age, sex, and other demographic factors. The data is available in a disaggregated format, allowing for analysis by age, sex, and other demographic factors.
