3.b. Data collection method

MoLVT (Molecular Lattice Vibration Theory) is a computational method used to calculate the vibrational frequencies of molecules. It involves solving the eigenvalue problem for the Hessian matrix, which is derived from the second derivatives of the potential energy function with respect to the atomic coordinates.

3.g. Institutional mandate

The institutional mandate of the TVET system is defined by the legal framework, which includes the TVET Act, the TVET Regulation, and the TVET Decree. The TVET Act is the primary legal instrument that defines the TVET system and its objectives. The TVET Regulation and the TVET Decree provide further details on the implementation of the TVET system. The institutional mandate of the TVET system is to provide quality TVET education and training to the youth and adults, and to ensure that the TVET system is responsive to the needs of the labor market.

4.a. Rationale

The rationale for the TVET system is based on the need to provide quality TVET education and training to the youth and adults, and to ensure that the TVET system is responsive to the needs of the labor market. The TVET system is designed to provide a comprehensive and integrated TVET system that covers all levels of TVET education and training, from basic TVET education to advanced TVET education and training.

4.c. Method of computation

The method of computation for the TVET system is based on the TVET Act, the TVET Regulation, and the TVET Decree. The TVET Act defines the TVET system and its objectives, and the TVET Regulation and the TVET Decree provide further details on the implementation of the TVET system. The method of computation for the TVET system is to ensure that the TVET system is responsive to the needs of the labor market, and to provide quality TVET education and training to the youth and adults.

4.d. Validation

The validation of the TVET system is based on the TVET Act, the TVET Regulation, and the TVET Decree. The TVET Act defines the TVET system and its objectives, and the TVET Regulation and the TVET Decree provide further details on the implementation of the TVET system. The validation of the TVET system is to ensure that the TVET system is responsive to the needs of the labor market, and to provide quality TVET education and training to the youth and adults.

4.i. Quality management

The quality management of the TVET system is based on the TVET Act, the TVET Regulation, and the TVET Decree. The TVET Act defines the TVET system and its objectives, and the TVET Regulation and the TVET Decree provide further details on the implementation of the TVET system. The quality management of the TVET system is to ensure that the TVET system is responsive to the needs of the labor market, and to provide quality TVET education and training to the youth and adults.

4.j. Quality assurance

The quality assurance of the TVET system is based on the TVET Act, the TVET Regulation, and the TVET Decree. The TVET Act defines the TVET system and its objectives, and the TVET Regulation and the TVET Decree provide further details on the implementation of the TVET system. The quality assurance of the TVET system is to ensure that the TVET system is responsive to the needs of the labor market, and to provide quality TVET education and training to the youth and adults.

4.k. Quality assessment

The quality assessment of the TVET system is based on the TVET Act, the TVET Regulation, and the TVET Decree. The TVET Act defines the TVET system and its objectives, and the TVET Regulation and the TVET Decree provide further details on the implementation of the TVET system. The quality assessment of the TVET system is to ensure that the TVET system is responsive to the needs of the labor market, and to provide quality TVET education and training to the youth and adults.
