4.a. Rationale

The rationale for this study is to provide a comprehensive overview of the current state of research on the topic of [topic]. The study is motivated by the need to understand the underlying factors that influence [outcome] and to identify potential interventions that can be implemented to improve [outcome]. The study is designed to be a systematic review of the literature, which involves searching for and synthesizing all relevant research on the topic. The study is organized into four main sections: (1) Introduction, (2) Methods, (3) Results, and (4) Discussion. The Introduction provides a brief overview of the topic and the purpose of the study. The Methods section describes the search strategy and the criteria for selecting studies. The Results section presents the findings of the study, and the Discussion section discusses the implications of the findings for future research and practice.

4.b. Comment and limitations

The comment and limitations of this study are as follows. The comment is that the study provides a comprehensive overview of the current state of research on the topic of [topic]. The limitations are that the study is a systematic review of the literature, which means that it is limited to the studies that have been published in the literature. Additionally, the study is limited by the quality of the studies that were included in the review. The study is also limited by the scope of the review, which only covers the topic of [topic].

4.c. Method of computation

The method of computation for this study is as follows. The data were collected from a search of the literature using the following keywords: [keywords]. The data were then analyzed using the following methods: [methods]. The results of the analysis are presented in the following table: [table].

5. Data availability and disaggregation

The data for this study are available from the CDHS 2016 Data Report (English) [link]. The data are disaggregated by [disaggregation]. The data are also available in the following format: [format].
