4.b. Comment and limitations

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and covers a wide range of topics, including fertility, mortality, and health status. The data from the survey is used to monitor and evaluate the progress of development programs and to inform policy decisions.

5. Data availability and disaggregation

Demographic and Health Survey (DHS) data is available for a wide range of countries and regions. The data is disaggregated by age, sex, and education level. The data is also available for a wide range of indicators, including fertility, mortality, and health status. The data is available in a variety of formats, including PDF, Excel, and CSV.
