#### 4.b. Comment and limitations

Demographic and Health Survey (DHS) is a household survey that provides information on a wide range of demographic and health indicators. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health. The survey is conducted in a representative sample of households and includes information on population, fertility, mortality, and health.

## 5. Data availability and disaggregation

Demographic and Health Survey (DHS) data are available for a wide range of countries and regions. The data are available in a disaggregated format, allowing for analysis by age, sex, and other demographic factors. The data are available in a disaggregated format, allowing for analysis by age, sex, and other demographic factors. The data are available in a disaggregated format, allowing for analysis by age, sex, and other demographic factors.
