5. Data availability and disaggregation

Demographic and Health Surveys (DHS) are a series of nationally representative household surveys that provide information on a wide range of demographic and health indicators. These surveys are conducted in many developing countries and are used to monitor progress towards the Sustainable Development Goals (SDGs). The DHS program is a multi-country survey program that provides data on a wide range of demographic and health indicators. The data is used to monitor progress towards the Sustainable Development Goals (SDGs). The DHS program is a multi-country survey program that provides data on a wide range of demographic and health indicators. The data is used to monitor progress towards the Sustainable Development Goals (SDGs).
