#### 4.a. Rationale

[illegible]

#### 4.b. Comment and limitations

[illegible]

Demographic and Health Survey (DHS) is a household survey that provides information on the demographic and health status of the population. The survey is conducted by the National Institute of Statistics (NIS) in collaboration with the DHS Program. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status.

#### 4.c. Method of computation

Demographic and Health Survey (DHS) is a household survey that provides information on the demographic and health status of the population. The survey is conducted by the National Institute of Statistics (NIS) in collaboration with the DHS Program. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status.

#### 5. Data availability and disaggregation

Demographic and Health Survey (DHS) is a household survey that provides information on the demographic and health status of the population. The survey is conducted by the National Institute of Statistics (NIS) in collaboration with the DHS Program. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status.

#### 7. References and Documentation

[1] Demographic and Health Survey (DHS) is a household survey that provides information on the demographic and health status of the population. The survey is conducted by the National Institute of Statistics (NIS) in collaboration with the DHS Program. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status. The survey is conducted in a household setting and covers a wide range of topics, including fertility, mortality, and health status.
