4.a. Rationale

The rationale for this study is to provide a comprehensive overview of the current state of research on the topic of [topic]. The study is motivated by the need to understand the underlying mechanisms and factors that influence [topic]. The study is designed to address the following research objectives: [objectives]. The study is organized into five main sections: [sections]. The study is expected to contribute to the existing knowledge on [topic] by providing new insights and evidence. The study is expected to be useful for [stakeholders].

4.b. Comment and limitations

The study has several strengths and limitations. The strengths of the study include [strengths]. The limitations of the study include [limitations]. The study is expected to contribute to the existing knowledge on [topic] by providing new insights and evidence. The study is expected to be useful for [stakeholders].

4.c. Method of computation

The method of computation used in this study is [method]. The data used in the study is [data]. The study is expected to contribute to the existing knowledge on [topic] by providing new insights and evidence. The study is expected to be useful for [stakeholders].

5. Data availability and disaggregation

The data used in this study is available from the CDHS 2016 dataset. The data is disaggregated by [disaggregation]. The study is expected to contribute to the existing knowledge on [topic] by providing new insights and evidence. The study is expected to be useful for [stakeholders].
