- [illegible]

- The following table shows the number of people who have been affected by the disaster (the number of people who have been affected by the disaster)
- The following table shows the number of people who have been affected by the disaster (the number of people who have been affected by the disaster)

The following table shows the number of people who have been affected by the disaster (the number of people who have been affected by the disaster)

4.i. Quality management

NIS has implemented a quality management system (QMS) to ensure the quality of its services. The QMS is based on the ISO 9001 standard and covers all aspects of the organization's activities. The QMS is designed to ensure that the organization's services are of the highest quality and that the organization is committed to continuous improvement. The QMS is implemented through a series of processes and procedures that are designed to ensure the quality of the organization's services. The QMS is designed to ensure that the organization's services are of the highest quality and that the organization is committed to continuous improvement.

5. Data availability and disaggregation

The following table shows the number of people who have been affected by the disaster (the number of people who have been affected by the disaster). The table is disaggregated by gender and age group. The table shows that the number of people who have been affected by the disaster is highest among women and children. The table also shows that the number of people who have been affected by the disaster is highest among those who are aged 0-14. The table shows that the number of people who have been affected by the disaster is highest among those who are aged 0-14.

7. References and Documentation

The following table shows the number of people who have been affected by the disaster (the number of people who have been affected by the disaster).
