2.b. Unit of measure

□□□□□ (%)

3.a. Data sources

(MEF) (MEYS)

3.b. Data collection method

The data sources listed in Table 1 are used to construct the variables in the model. The data are collected from various sources, including the MEYS, the Ministry of Education and Science, and the Ministry of Health. The data are then processed and analyzed to estimate the parameters of the model.

3.c. Data collection calendar

The data collection calendar is shown in Table 2.

3.d. Data release calendar

The data release calendar is shown in Table 3.

3.e. Data providers

The data providers are listed in Table 4.

3.f. Data compilers

The data compilers are listed in Table 5.

3.g. Institutional mandate

The institutional mandate is shown in Table 6. The mandate is to collect and analyze data on the health and education of the population. The data are used to estimate the parameters of the model and to evaluate the impact of the policy. The data are collected from various sources, including the MEYS, the Ministry of Education and Science, and the Ministry of Health. The data are then processed and analyzed to estimate the parameters of the model.

4.a. Rationale

The rationale for the study is to estimate the parameters of the model and to evaluate the impact of the policy. The data are collected from various sources, including the MEYS, the Ministry of Education and Science, and the Ministry of Health. The data are then processed and analyzed to estimate the parameters of the model.

4.b. Comment and limitations

The comment and limitations are shown in Table 7. The comment is that the data are collected from various sources, including the MEYS, the Ministry of Education and Science, and the Ministry of Health. The limitations are that the data are not perfect and that there are some missing values.

4.c. Method of computation

[illegible][illegible]
$$= \frac{1}{n} \sum_{i=1}^n \left(\frac{\partial L(\theta)}{\partial \theta} \right)_{\theta=\theta_i}$$
[illegible]
