3.a. Data sources

(MEF) (MEYS)

3.b. Data collection method

The data sources listed in Table 1 are used to construct the variables in the model. The data are collected from various sources, including the Ministry of Education and Science (MEYS), the Ministry of Health, and the Ministry of Labour. The data are then processed and analysed to identify the factors that influence the outcomes of the study.

3.c. Data collection calendar

The data collection calendar is as follows:

3.d. Data release calendar

The data release calendar is as follows:

3.e. Data providers

The data providers are as follows:

3.f. Data compilers

The data compilers are as follows:

3.g. Institutional mandate

The institutional mandate is as follows: The Ministry of Education and Science (MEYS) is responsible for the collection and analysis of data on the outcomes of the study. The Ministry of Health is responsible for the collection and analysis of data on the health status of the population. The Ministry of Labour is responsible for the collection and analysis of data on the labour market. The data are then processed and analysed to identify the factors that influence the outcomes of the study.

4.a. Rationale

The rationale for the study is as follows: The study aims to identify the factors that influence the outcomes of the study. The study is based on the following assumptions: The data are collected from various sources, including the Ministry of Education and Science (MEYS), the Ministry of Health, and the Ministry of Labour. The data are then processed and analysed to identify the factors that influence the outcomes of the study.

4.b. Comment and limitations

The comment and limitations of the study are as follows: The study is based on the following assumptions: The data are collected from various sources, including the Ministry of Education and Science (MEYS), the Ministry of Health, and the Ministry of Labour. The data are then processed and analysed to identify the factors that influence the outcomes of the study.

4.c. Method of computation

_____ (_____, _____
_____) _____
_____ (_____) _____

$$= \frac{1}{n} \sum_{i=1}^n \frac{1}{\sqrt{2\pi}} \exp\left(-\frac{1}{2} \left(\frac{y_i - \mu}{\sigma}\right)^2\right)$$
$$= \frac{1}{n} \sum_{i=1}^n \left(\frac{\partial L(\theta)}{\partial \theta} \right)_{\theta=\theta_i}$$
[illegible]

4.d. Validation
